
Accidental Project Manager?

Most of us come into the profession because of our success in some other technical or business area.

We need the tools that take that previous success and turn it into a new skill that leads our teams from within.

93% of our Fortune 500 companies feel that strong Project Management will be the key to future success and profitability.

Two Days

A look at the basics.

*A chance to become successful and
understand what others are talking
about.*

Project Management has its own distinct language and it is an international language. With over 300,000 members and 200,000 certified Project Managers world wide, PMI has helped advance the profession and made strong project managers a key to successful companies. We will begin to understand how we can be a part of one of the fastest growing professions. What are the keys to project success and how can you utilize them.

Need to gain effectiveness from the use of the best tools? This class will help give you ideas that you can use in your next project, hopefully tomorrow.

Class includes a copy of Project Management Institute's PMBOK, (body of knowledge), a 200+ page notebook, a light breakfast and lunch each day.
